- Public areas

RECOMMENDED EQUIPMENT

- Fixed and Mobile Rotary Atomiser Range
- Mobile Mini Mister Range
- Fixed and Mobile Pacific Nozzle Line
- Fixed Jetstream Range

ASE disinfect is our best-selling, bio-degradable range of disinfectant chemical additives. Killing bacteria, viruses and fungi, disinfect acts to protect your immediate environment. ASE disinfect is supplied as a concentrate which is then diluted on-site with potable water at a rate of 40%, this can then be used as a wipe-down solution or in conjunction with our fogging equipment.

Methods of application:

- Vehicle arches can be prepared using our pacific equipment range, to disinfect vehicles as they come in and out of site.
- Large area misting application via fogging equipment such as our rotary atomiser range
- Smaller area misting application using smaller fogging equipment such as our mini mister range
- Direct application via backpack sprayer
- Direct wipe-down solution application

Effective against:

Viruses (Including Orthomyxoviridae)

Bacteria

Fungi

Our additive range

We also offer additives for:

Odour Control
Dust Management
Insect Control

At Air Spectrum we also offer a 'call-off' based service for chemical additives for convenience, ease and flexibility. Our call off service is a pre-pay service for 6-month, 12-month or 24-month blocks of chemical delivery. During this time, simply pick up the phone when you need the chemical and we will get it sent out the door as a priority. Once the initial payment is made you will not need to worry about any additional financial paperwork when calling off your chemical, there will be no extra charges as we work out all the costs right from the start ensuring complete transparency throughout your subscription.
