

Dispersal Equipment - Fans & Atomisers

Vortex Mobile Fan

PRODUCT AIM

The portable Vortex Mobile Fan system is specifically designed to treat localised odour issues and dust, effectively neutralising odour when and wherever it occurs. Limiting the release of odour to neighbouring communities and employees prevents complaints and investigation whilst ensuring compliance with air pollution regulations.

HOW IT WORKS

This robust wheel-mounted unit can be quickly and easily moved to wherever odour occurs. Its availability on-site for emergency use ensures the operator is always prepared for unexpected problem. The system is compact, sturdy and powerful.

Liquid neutraliser and water is pumped through the fan which produces a fine mist of micron fine particles that can be propelled up to 10 metres, rapidly and effectively reducing odour. The system works most efficiently with the *Odr* additive range, non-toxic odour neutralisers supplied by Air Spectrum which are effective in any environment. Please see the *Odr* product datasheet or website for more information.

Air Spectrum Environmental Limited continually strives to improve its products and therefore reserves the right to introduce modifications to their product range without notice.

FEATURES

- Wheel mounted
- Propels up to 10m
- Compact – manoeuvrable by one person
- Variable flow control

KEY INFORMATION

- Mains electricity powered (110V)
